

SYSTEM AND METHOD FOR PROVIDING SECURITY
IN A TELECOMMUNICATION NETWORK

ABSTRACT OF THE DISCLOSURE

5 A method is provided for establishing a telephone call
between a trusted Internet Protocol (IP) telephone and an
untrusted device. The method includes receiving a call
initiation request from the untrusted device that indicates
a desired communication with the trusted IP telephone. The
method evaluates the call initiation request, and
establishes a telecommunication link between the untrusted
device and the trusted IP telephone in response to a
10 positive evaluation of the call initiation request.
